Community Facilities (Open Space, Sport and Recreation) 2018 analysis

Extract from “Chichester Open Space, Sport Facilities, Recreation Study and playing pitch strategy, open Space Analysis (Part 2 of 2, page 8) Extract. September 2018. (This section relates to the Study’s analysis of the East West Corridor as a whole).

“1.2 Analysis of existing quantity of open space

An analysis of the existing provision (in ha and ha/1000 population) and supply (in ha and ha/1000 population) of open space for each sub area is provided. The analysis uses the quantity standards for open space detailed in part 1 of the report and summarised in table 1. The supply is calculated using the population figures for each sub area, and the quantity of open space compared to what the requirements for open space are against the standards set.

Table 1 Summary of quantity standards of open space

Typology	Quantity standards (ha/1000 population) for analysing existing provision	Quantity standards (ha/1000 population): requirements from new development
Allotments	0.30	0.30
Amenity Green Space	0.6	See standard for Natural Green Space
Parks and Recreation Grounds	1.2	1.2
Play Space (Children)	0.05	0.05
Play Space (Youth)	0.05	0.05
Natural Green Space	ANGSt	1.0 to include natural and amenity green space
Total for new provision		2.6 ha/1000

1.3 Analysis of existing access to open space

For each of the 3 sub areas, maps are provided showing access to different types of open space using the overall Chichester access standards from the main report (part 1), as summarised in table 2. A summary of key access issues is provided for each sub area.

Table 2 Summary of access standards
